... to give you a separate, independent view of what you are into in what is not decent journalism is propaganda for this slim co-author a copy of what I received today from a time, solid young man just out of law school. Only # 2 in his class because he was also teaching and was ex. ed. of the law review. I have stopped buying all the crap on it so sure as I do not have this bad book. I don't know if this is made up, if that woman is crazy or what. But there is more than reward says. like Inga Arvad was a "ex friend, not a Nazis FBI agent. I'm reasonably certain there was no Super 8 movie film in 1963 as I am that the existing pictures show her to be older than 19 and the camera she held in her hand to be smaller than the fashion camera of that day. How can you make puke into the typewriter over this kind of stuff? LW 4/8/77
